

Learning Support for Intelligence: Functionality and Environment

<http://kes2012.kesinternational.org/>

10, 11, & 12, September 2012
San Sebastian, SPAIN

Scope and topics

Currently, service sciences or informatics are one of interesting topics, with respect to the application of cloud computing platform, the design and utilization of knowledge-information information system, the intelligent interaction through information systems, the analysis and synthesis of information activity, and so on. Education and learning supports are truly a main domain of these service-oriented behaviors and service-specific systems. Service is established with the provider-consumer relationship between two different roles of human beings. The objective of education or learning support is really a service as it is: knowledge transfer from provider to consumer. This invited session focuses on the architectural paradigm of education and learning support from a viewpoint of service orientation. Our main keywords for the discussion topic are: Collaboration mechanism, Knowledge sharing in learning, Knowledge transfer in learning, Knowledge media for learning support, Functionality of learning support system, Interaction between environment and learners, Exchange between learning and education, ICT support for home learning, Social media for learning, Human interface for operation and communication, Advanced e-Learning, etc.
